
Problems with Jupyter

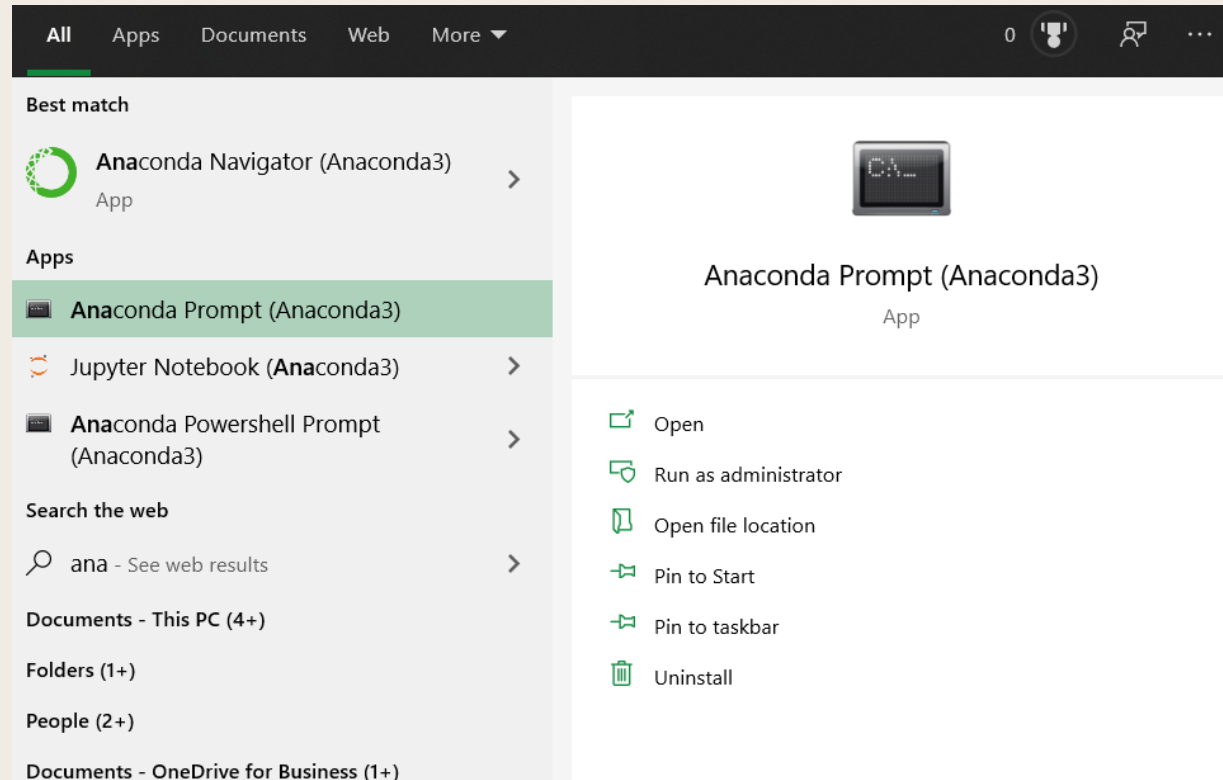

List of possible problems

- OpenCV not loading
- Export the file as pdf

We will fix it ourselves in the lab machines but follow the next steps if you having one of these problems in your laptop.

OpenCV not loading

- Open the anaconda prompt from the start menu

OpenCV not loading

- Type the following command inside the anaconda prompt and run it:

`pip install opencv-python`

If you have a Mac, you can go directly in the terminal and run it.

Export the file as pdf

- If you are getting this error:

- You need to install this package into your pc:
<https://miktex.org/download>
